

## 9 Mid Monthly CodeIgniter Question

### Sheet 1

1. By default which file is set to the default controller?  
a) \$route['default\_controller'] = 'view'  
b) \$route['default\_controller'] = 'index'  
c) \$route['default\_controller'] = 'welcome'  
d) None of the above
2. A model Class extends which class?  
a) CI\_Model  
b) CI\_View  
c) CI\_Control.  
d) CI\_Database
3. Where we get core classes?  
a) libraries                      b) Helpers  
c) Plugins                        d) Config
4. An Environment variable CI is called?  
a) codeigniter\_EV  
b) CI\_ENV  
c) CI\_ENVIRONMENT  
d) C\_ENV
5. Which is refers to the system of numbering pages?  
a) Pagination                      b) Rotating  
c) Cropping                        d) thumbnai
6. Which file you have to set encryption key to safe password?  
a) Database.php  
b) config.php  
c) encryption.php  
d) None

7. Which of the following function used to change the error delimiter?  
a) set\_error\_delimeter  
    set\_error\_delimeters  
b) set\_errors\_delimeter  
c) set\_errors\_delimeters  
d) set\_error\_delimeters
8. CodeIgniter is built on what language?  
a) Java language  
b) C language  
c) C+ language  
d) PHP language
9. What types of data are stored in a session? (Choose all that are applicable)  
a) IP address  
b) User agent string  
c) Timestamp  
d) All of the above

### Sheet 2

10. Which rule is used to set fixed length for a form field?  
a) min\_length[x]  
b) max\_length[x]  
c) exact\_length[x]  
d) fixed\_length[x]
11. To destroy session completely which of the following function would be use?  
a) Unset\_userdata()  
b) Sess\_destroy()  
c) Destroy()  
d) Set\_flashdata()

12. How can you make your codeIgniter site more secure?  
 a) By limiting database access  
 b) By query binding  
 c) By filtering  
 d) By changing default file structure  
 e) Both A & C
13. Which configuration file is used to autoload resources?  
 a) routes  
 b) autoload  
 c) database  
 d) config
14. To 'set\_data()' function use for the\_\_?  
 a) set validation  
 b) set number  
 c) set string  
 d) input data
15. Choose the correct answer?  
 a) we cannot load multiple helper by passing an array of values to the first parameter.  
 b) Plugins are stored within system/application/plugins/folder.  
 c) all codeigniter core libraries have the prefix CI\_  
 d) helper can only be loaded in controller and model. View cannot load helper
16. Which function is use to the value of form input box?  
 a) setvalue()  
 b) set()  
 c) set\_value()  
 d) None of above
17. Which is correct for naming a class?  
 a) class MYClass  
 b) class myClass  
 c) class My\_class  
 d) All
18. Which layer of the model handles getting the information from the database?  
 a) The business logic layer  
 b) The data access layer  
 c) a and b both  
 d) None of them
19. What should we do to prevent 'database hack'?  
 a) strong authentication  
 b) authorization limit  
 c) SQL injection attacks  
 d) All
20. What is do you mean by data seeders?  
 a) Manage Multiple database on the same model.  
 b) Ensure the security of website  
 c) Input Dummy data into database to check traffic  
 d) This is useful for production build on a web application.
21. Which of the following is correct for uploading file type?  
 a) \$config['allowed\_type']  
 b) \$config['allowed\_types']  
 c) \$config['allow\_type']  
 d) \$config['allow\_types']
22. To validate an email address which of the following is used?  
 a) Email Library  
 b) Email Helper  
 c) Form Validation Library  
 d) Form Helper
23. How can you change Base URL?  
 a) databse  
 b) config  
 c) routes  
 d) autoload
